PROFILE

I am a passionate and dedicated Website Developer with over 3 years of experience in designing and developing modern, high-performance web applications. My core expertise lies in both PHP-based technologies such as Laravel and CodeIgniter and the JavaScript-based MERN stack, which includes MongoDB, Express.js, React.js, and Node.js. This combination allows me to work efficiently on both frontend and backend development, delivering full-stack solutions that are fast, scalable, and user-friendly.

Over the years, I have worked on a wide range of projects in different industries, including e-commerce, healthcare, and business management systems. These projects have helped me build strong technical skills in creating responsive user interfaces, integrating APIs, managing databases, and developing secure authentication systems. I take pride in writing clean, maintainable code and always follow best practices to ensure the quality and reliability of my work.

In addition to my technical skills, I also have experience in project leadership and team collaboration. I have successfully led development tasks, guided junior developers, and contributed to team discussions to solve complex problems. I enjoy helping others grow by sharing knowledge and supporting team members whenever possible.

My goal is to build digital products that not only meet client needs but also provide a great experience for end users. I am always eager to learn new technologies, take on new challenges, and continue growing as a professional web developer.

EDUCATION

Bachelor of Science – BS, Computer Science

Aug 2019 – Aug 2023

University of Agriculture, Peshawar, Peshawar

- I pursued a Bachelor of Science in Computer Science (BSCS) from the Agricultural University of Peshawar, graduating in 2023.
- During my academic journey, I gained a comprehensive understanding of computer science principles, programming languages, and software development methodologies.
- My final year project, the School Management System developed in Laravel, stands as a testament to my practical skills and ability to apply theoretical knowledge to real-world projects.
- This project encompassed features such as attendance tracking, teacher promotions, student fee systems, and result management, demonstrating my proficiency in developing robust and functional web applications.

EMPLOYMENT

Full Stack Web Developer

Devify Solutions, Pakistan

Jul 2022 – Present

- As a Senior Developer at Devify Solutions, I have been instrumental in leading the development and deployment of over 11 projects, spanning diverse domains such as e-commerce, cryptocurrency trading, hospital management, and web gaming.
- My role involves not only coding and technical implementation but also mentoring and training new interns, ensuring a continuous flow of talent and knowledge within the team.
- I am proud to have contributed to projects like Coin247, a cryptocurrency buy-sell platform, and MTN Doktor Connect, an online hospital management system, showcasing my ability to deliver high-quality solutions that meet client needs and industry.

TECHNICAL SKILLS

Frontend Development : HTML5, CSS3, Bootstrap
JavaScript (ES6+), jQuery React.js (Hooks,
Redux, Router) Responsive Design & Cross-
Browser Compatibility

Backend Development : PHP (Core PHP, Laravel,
CodeIgniter) Node.js, Express.js , RESTful API
Development , Authentication & Authorization
(JWT, Laravel Sanctum/Passport)

Database Management : MySQL / MariaDB ,
MongoDB , Database Design & Optimization , Query
Building & Eloquent ORM & Sequelize ORM

Tools & Technologies : Git & GitHub , Postman (API
Testing) , VS Code, XAMPP , npm, Composer

CERTIFICATE

Full Stack Developer Certification

Jun 2021

- I completed the Full Stack Developer Certification from TRUSTACK Software House in 2021.
- This certification program equipped me with a comprehensive skill set in both frontend and backend development, covering languages, frameworks, and tools essential for full stack web development.
- Through hands-on projects and practical training, I honed my abilities in PHP frameworks like CodeIgniter and Laravel, as well as frontend technologies including HTML, CSS, Bootstrap, React, JavaScript, and jQuery.
- This certification not only validated my expertise but also provided me with the confidence and knowledge to excel in the field of web development.
